ACCURACY IS EVERYTHING

Controlling moisture content & warpage is key in our process

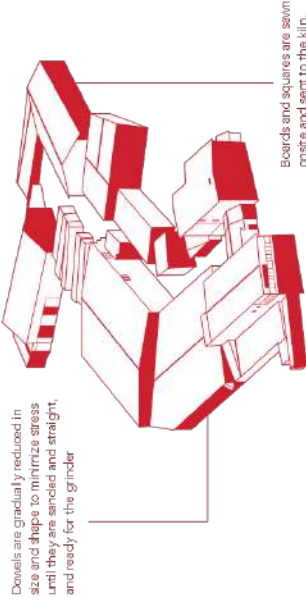

WHY DO STICKS WARP?

Sticks warp when they lose moisture. Sticks manufactured with 6%-8% moisture content come out of the factory with very little moisture to lose. On the other hand, sticks that are manufactured to 10%-12% moisture content have a fair amount of evaporating to do before they reach average indoor humidity, which is 6%-8%. It is this post-manufacturing water loss that warps a drumstick.

OUR ANTI-WARP PROCESS

Wood is inspected for straightness throughout the manufacturing process, not just at the end. Any wood that does not meet our stress and warpage standards goes to our boiler to heat the kilns.

SUSTAINABLY SOURCED

2.45 new Appalachian Hardwood trees grow naturally for everyone that is harvested or dies.* Net annual growth has been increasing for more than fifty years. Responsible sourcing ensures hickory and other Appalachian hardwoods will be around for generations to come.

*USDA data

90% of our sticks are made from hickory

90% of the water we use is reclaimed

SINCE 1992

We were the first company to package paired sticks together in paper sleeves which are now the industry standard, eliminating millions of plastic bags from landfills every year.

WE CARE ABOUT OUR PLANET

And have been committed to doing our part for decades. It's a part of our DNA. Our stick sleeves and cartbags are printed by our FSC certified supplier using wind power and vegetable based inks. Recycling matters. All our cardboard, paper and metal is sorted. The rest goes to a zero-sort single-stream recycling program

WE ARE PROUD SUPPORTERS OF SUSTAINABLE FORESTRY:

AMERICAN CLASSIC®

AMERICAN CLASSIC

Home to the world's most popular drumsticks, the American Classic® line combines tradition and Vic Firth style. With bold designs, the Classics are turned from select hickory — a dense wood with little flex for a more pronounced sound. Hickory is also capable of withstanding a great deal of shock, making it highly durable. The tips are deeply back-cut for intensified cymbal response.

AMERICAN CONCEPT & SOUND

AMERICAN CONCEPT

Freestyle draws inspiration from the dynamic world of Freestyle's longboarding. For Freestyle riders, it's about expression and flow. They have the versatility to move

up and down the board without losing control. Vice Freestyle series combines a massive overall length of 17" with extra long tapers. This combination of length and

extended taper more than doubles the "sweet spot" of the fulcrum — offering a wide array of responses and feels out of the same pair of sticks.

MODERN JAZZ COLLECTION

Some secrets are too good to keep quiet. Over the years and in collaboration with some of the world's top

artists, the design team at Vic has produced thousands of prototypes ranging from the highly experimental to the

straight-ahead. This has been our secret playground. The MJC series have been staples in our back room for years – and

while the name says 'Modern Jazz', we've found they are exceptional in almost any musical setting.

“I’ve played a lot of different sticks, searching for that perfect size, one that allows me to get the articulations I want and not have to exert so much energy. I think we really knocked it out of the park with this signature stick.”

Vic Firth's complete line of Rute is designed to provide the player with alternative sounds and feels across a variety of musical settings. Unless

otherwise indicated, each Rute model features premium birch dowels secured in a birch drumstick handle. The handle provides a natural feel and can

also be used for back beats, cross rim work and intricate patterns on the cymbal bell. A moveable band adjusts the effect from crisp to splashy.

RUTE RUTE

Our original. Designed for all-around rock, jazz and combo playing. With 16 dowels (125").

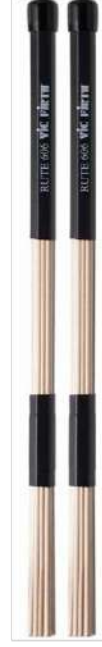

Length: 16.375"

Handle Diameter: 0.750"

RUTE505 RUTE 505

This model is a great choice for jazz or combo playing and is incredibly durable. With thirty-one plastic bristles (.094") secured in a vinyl handle.

RUTE606 RUTE 606

For the Rute player who prefers a rubber handle and fixed position band. Designed for all-around playing. With 19 dowels (115").

ALTERNATIVE IMPLEMENTS

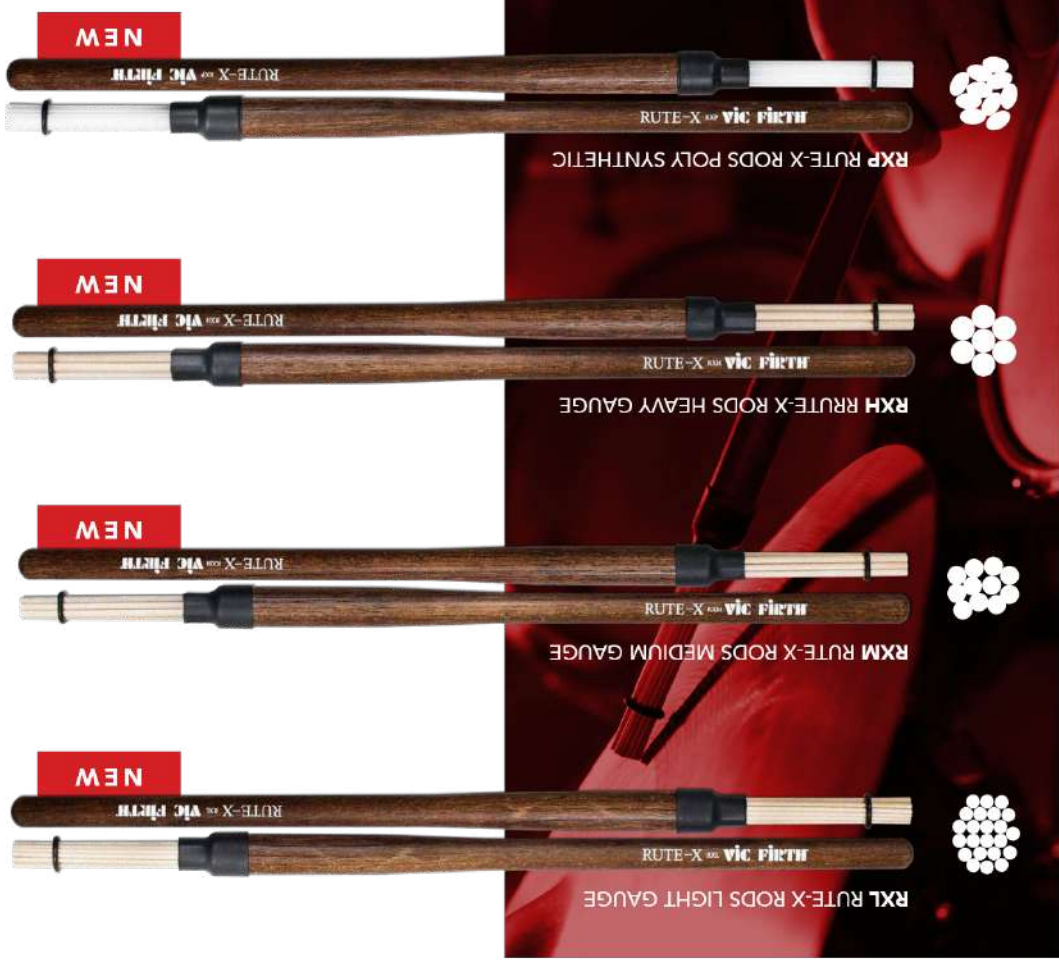

RUTE-X

The feel and response of a drumstick with the volume control and alternative sounds of a rod product. The Vic Firth RUTE-X rods offer unparalleled

dynamic versatility, solid rimshots, and cross sticking that you just can't get with traditional rods. Perfect for the studio, practice, or any low

volume setting. Available in 4 models: light gauge birch, medium gauge birch, heavy gauge birch, and a durable synthetic.

Length: 16.25"
Handle Diameter: 0.58"

VICKICK BEATERS®

The VicKick Beaters® were designed with sound quality as the number one priority. Each model features a spherical head for a consistent striking surface and provides a distinct level of articulation, all while achieving an enhanced low-end sound. Within the VicKick series, both the felt and wood beaters feature a unique dual striking position. Set in the "radial"

position, the beater provides clear articulation; consistent rebound and allows for side-by-side clearance when used on double pedal setups. The "flat" position increases beater

surface contact for enhanced sound. The fleece beater is crafted with an oval felt core and sets up in a singular position.

VKB1 VICKICK™ BASS DRUM BEATER MEDIUM-HARD FELT, RADIAL HEAD
Medium-hard premium felt head creates clear articulation with a full low-end sound. Dual orientation offers multiple sound and feel options.

A fantastic general beater for all musical styles!

VKB2 VICKICK™ BASS DRUM BEATER HARD MAPLE, RADIAL HEAD

Hard maple head creates super rhythmic clarity. Weight of ball helps produce a full sound. Dual orientation offers multiple sound and feel options. Ideal for rockers looking for the ultimate in articulation!

VKB3 VICKICK™ BASS DRUM BEATER MEDIUM FELT CORE COVERED WITH FLEECE, OVAL HEAD

Medium felt core covered with fleece for an incredibly full and warm sound.

Outstanding for jazz!

VKB4 VICKICK™ BEATER SPHERICAL FOAM RUBBER, FOR CAJON

A spherical foam rubber head produces a warm, full bass tone on Cajon with just the right amount of attack. Works perfectly for electronic drum kit applications as well. Or think outside the "box" and try it out on your acoustic bass drum, too!

VKB5 VICKICK™ BEATER WOOD SHAFT

Wood shaft distributes weight for a unbelievable sense of balance and throw. The VKB5 unlocks a sense of touch and control that is simply not attainable with other beaters on the market.
