

Damien Elite 7 Wiring Diagram

= ground. This symbol is found where any ground connection should be soldered.

Damien Elite C-7 Neck Specs:

Scale Length: 674mm/26.5"

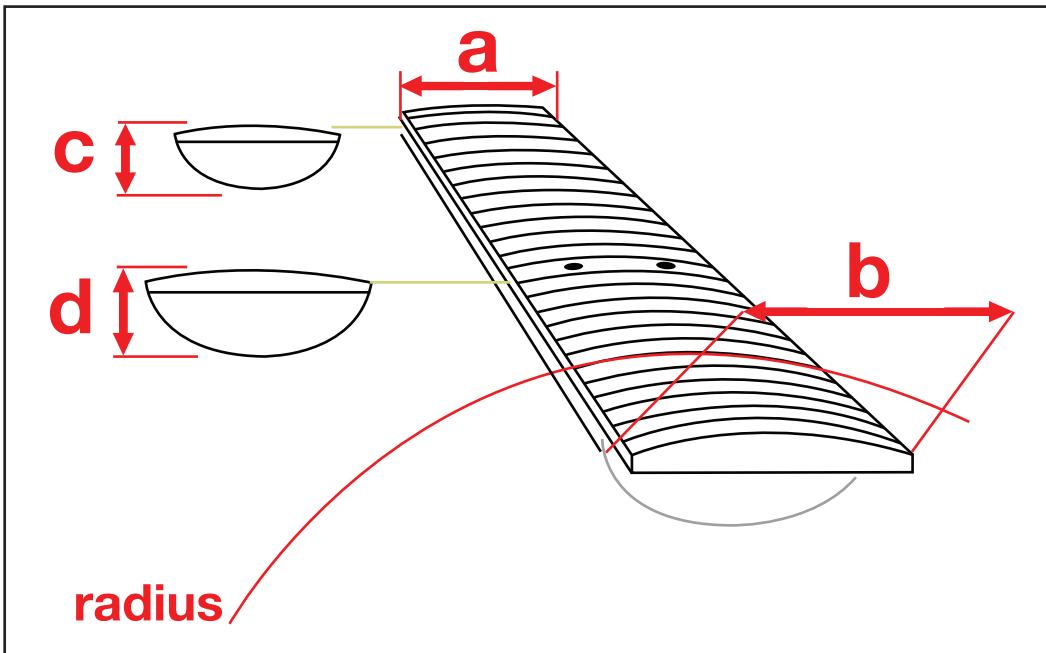

A: Width at Nut- 48mm

B: Width at Last Fret- 68mm

C: Thickness at 1st Fret- 20mm

D: Thickness at 12th Fret- 22mm

Radius: 406mm/16"

Bridge Pickup

Name:	EMG 81-7
Model No:	81-7
Construction:	Humbucker
Magnet:	Ceramic
Output:	Impedance 10K ohm
Description:	The 81-7 is a high output pickup designed especially for the 7-string lead guitarist. The 81 is at its best for high volume overdrive and amps with a master volume. Whether you're playing power rock and roll, or overdriving your amp, there's a razor sharp attack, and incredible sustain for brilliant soloing.

Neck Pickup

Name:	EMG 85-7
Model No:	85-7
Construction:	Humbucker
Magnet:	Alnico V
Output:	Impedance 10K ohm
Description:	Featuring Alnico V loaded wide aperture coils we were able to beef up that Low B tone and at the same time provide a more responsive super tight overall sound. Whether you are ringing out Opeth-style jazzy chords or playing palm muted death chugs, even with the amp set to "kill", these pickups will articulate every note, harmonic and squeal you ask of them.

Strings

7-String Guitar*

Tuning: B-E-A-D-G-B-E

Gauge: .056-.046-.036-.026-.017-.013-.010
(EB Regular Slinky #2621)

*Changing to different string gauges and/or alternate tunings may require minor neck/bridge adjustments for optimal performance. For Schecter setup tips refer to Schecter Setup Guide.

This model is equipped with a Graph Tech Black TUSQ XL nut. The Black TUSQ XL delivers a rich and balanced tone with big open lows and a noticeable increase in overall sustain followed by a very balanced output from your strings. Laboratory-proven to enhance harmonic content up to 200% and sustain up to 16% and is engineered for maximum vibration transfer. Designed to transfer the right frequencies more efficiently from the string to the guitar body. Compared to standard materials such as bone, micarta or corian, you'll hear more harmonics with every note you play when you use TUSQ XL on your guitar. As compared to TUSQ, you will hear added midrange depth, and is impregnated with Teflon to improve the tuning performance of the guitar.
