

Please read these instructions in order to achieve the best results for your vinyl records and to prevent accidental damage due to incorrect use of the cleaning kits contents.

Regular cleaning of vinyl records prevents build-up of dust, keeps them in the best condition and allows them to sound as good as possible.

The Carbon Fibre Anti-Static Brush

This eliminates static charge while removing fine dust particles.

- Whilst the vinyl record is in place on the player and rotating, hold the metal handle of the brush and place it on the record.
- Move the brush slowly from the centre of the record to the outside edge, repeating the action if necessary.
- Move the black handle across the brush to clean off dust and debris and then click into place over the brush for storage.

The Stylus Cleaning Brush

Designed to clean your stylus and hard to reach places, the small brush is great for reaching the stylus tip.

- Simply place the brush on the back of the stylus and brush forward.
- Repeat this action until the stylus is clean.

Cleaning Solution and Micro Fibre Cloth

Ideal for a deeper clean.

- Before using the solution, remove as much of the dust and particles from the record surface as possible using the carbon fibre brush provided in this kit.
- Aim spray nozzle at the vinyl from a distance of approx 15cm.
- Use sparingly and avoid getting the centre record label wet when spraying.
- The enclosed micro fibre cloth should be used to clean the record and will absorb the solution. To clean the record evenly, keep your fingers flat (do not use your nails) and gently rub your cloth over the vinyl record in a circular motion along the grooves, go in circles clockwise from the centre around the record until you reach the outside edge. The micro fibre cloth can be used repeatedly by washing it in a regular washing machine.

Vinyl Wet Cleaning Wipes

An alternative to the cleaning solution and cloth method above, these tissues efficiently clean vinyl records. They are anti-static, alcohol and ammonia free and made from eco-friendly recyclable materials.

- Starting with wet cleaning wipes keep your fingertips flat (do not use your nails) and gently rub your cloth over the vinyl record in a circular motion along the grooves, go in circles clockwise from the centre around the record until you reach the outside.
- Repeat the process with the micro fibre cloth.

Velvet Cleaning Brush

Velvet cleaning brush, safely eliminates dust particles from the surface.

- Whilst the vinyl record is in place on the player and rotating, hold the handle of the brush and place it on the record.
- Move the brush slowly from the centre of the record to the outside edge, repeating the action if necessary.

Foldable LP Holder

This unique high quality foldable 12" LP holder will allow you to clean your records much more efficiently and allow them to completely dry whilst placed on the actual stand.

- Clean your records in the exact way as described above.

Keep out of reach from children and avoid direct sunlight exposure.
